SUMMARY

Frontend developer with nearly 3 years of experience building production web applications with React (Hooks, Redux), Next.js and TypeScript. Experienced in SSR/CSR trade-offs, SEO-driven rendering, server-state management (React Query, Redux Toolkit) and turning Figma designs into responsive, accessible interfaces. Works closely with Product, Design and QA to clarify requirements, define testable behavior and ship on schedule. Uses AI coding assistants daily to speed up development and review.

EDUCATION

Bachelor of Information Technology **2021 - 2024**
Royal Melbourne Institute of Technology (RMIT)

KEY SKILLS

- **Core Web:** React (Hooks), Next.js (App Router, SSR, CSR), TypeScript, JavaScript (ES2020+), HTML5, CSS3
- **UI and Styling:** Tailwind CSS, Ant Design, Responsive Design
- **State and Data:** Redux, React Query, Zustand, REST API integration, Zod
- **Testing and Quality:** Vitest, ESLint, Biome, Husky, SonarQube, CI/CD
- **Workflow:** Git, Agile/Scrum, Jira
- **AI Tooling:** Codex, Claude Code
- **Backend and Cloud:** Node.js, RESTful APIs, PostgreSQL, MongoDB, Firebase, Docker, AWS, Vercel
- **Languages:** Vietnamese, English

WORK EXPERIENCE

Frontend Developer, Novaland – Ho Chi Minh City **Apr 2026 – Sep 2026**

- Built an internal KPI management CMS with Next.js (App Router) and React, cascading company-level KPIs down to team and individual goals.
- Translated Figma designs into reusable, responsive components across desktop and mobile breakpoints, refining layouts, component states and user flows with designers before implementation.
- Structured the application into feature-based layers (presentation, business logic, data access, core) for scalability and maintainability across modules.
- Managed server state with Redux Toolkit and RTK Query, using tag-based cache invalidation and optimistic updates for real-time KPI data.
- Built type-safe forms with Zod validation and consistent error handling.
- Ensured code quality with Vitest unit tests, Biome, Husky and Git workflows.
- ***Technologies:*** *Next.js, React, TypeScript, Redux Toolkit, RTK Query, Zod, Ant Design, Vitest, Biome, Husky*

Frontend Developer, Nextway Technology – Ho Chi Minh City **Dec 2023 – Mar 2026**

- **heu!, Frontend Developer, Jul 2025 – Mar 2026**
  - Built an SEO-optimized Next.js (App Router) marketing website with SSR, dynamic metadata and routing, improving organic discoverability across the UAE.
  - Built a React CMS (SPA) with role-based access control, enabling content managers to manage 10,000+ merchant offers and card-linked deals without developer support.
  - Developed a React Native app (App Store and Google Play) with map-based offer discovery via Google Maps SDK and Places API, filtering and favorites.
  - Integrated Amplitude and AppsFlyer for behavior tracking and attribution analytics.
  - Worked with DevOps on AWS deployment (EC2, RDS, PostgreSQL) and with Product and Design to turn requirements into accessible interfaces.
  - ***Technologies:*** *Next.js, React, React Native, TypeScript, Google Maps SDK, Amplitude, AppsFlyer, AWS*
- **Toncash, Frontend Developer, Jan 2025 – Jun 2025**
  - Built a Telegram Mini App (React, TypeScript) for a Web3 offer discovery platform with 100,000+ users.
  - Developed a React CMS that let non-technical admins create, publish and monitor affiliate campaigns without developer intervention.
  - Built a TON transaction tracking module that verifies user deal interactions, adding transparency to affiliate payouts.
  - Delivered responsive interfaces with Ant Design and Tailwind CSS, enforcing code consistency with ESLint while working with designers and backend engineers.
  - ***Technologies:*** *React.js, TypeScript, Ant Design, Tailwind CSS, ESLint, Telegram Mini Apps*
- **Zalo Mini App, Frontend Developer, Jun 2024 – Dec 2024**
  - Built a Zalo Mini App (React, TypeScript) for healthcare professionals and patients, with seminar browsing, content feeds and a points-based rewards system.
  - Designed Redux state management for point accumulation, session tracking and real-time UI updates.
  - Partnered with backend engineers to integrate Zalo API endpoints for authentication and data sync.
  - ***Technologies:*** *React.js, TypeScript, Redux, Zalo Mini App, Zalo API*
- **MyKids, Frontend Developer Intern, Dec 2023 – May 2024**
  - Developed a React Native app for pre-school parents to track daily activities, receive real-time school notifications and message teachers directly.
  - Built a Next.js web portal with Zustand and Ant Design for school administrators to manage student records, class schedules and announcements across departments.
  - Owned UI implementation across web and mobile with TypeScript for consistent, type-safe interfaces aligned with client requirements.
  - ***Technologies:*** *Next.js, TypeScript, Zustand, Ant Design, React Native*
